Index to Volume 4

Abstracts, Tenth Anniversary Meeting American Association of Clinical Chemists, Iowa City, 538

Adaptation of the Beckman Model B. spectrophotometer to the measurement of dilute fluorescent solutions: Joly, L. P., Sobolewski, G., and Nadeau, G., 286

Alcohol, blood, 223

Alkalosis, 32

A new method for starch gel electrophoresis of human hemoglobins, with special reference to the determination of hemoglobin A_2: Goldberg, C. A. J., 484

An improved periodic acid—fuchsin sulfite staining method for evaluation of glycoproteins: McGuckin, W. F. and McKenzie, B. F., 476

APPEL, W., *see* MOINAT, P.

A rapid colorimetric method for the quantitative determination of copper oxidase activity (ceruloplasmin): Houchin, O. B., 519

ARONOVITCH, J., Determination of vitamin B_{12} with an *Escherichia coli* mutant: Its advantage in clinical use, 22

A simple determination of blood alcohol for the clinical laboratory: Mather, A., 223

Assay of urinary peptides using a biuret reagent: Balikov, B., Lozano, E. R. and Castello, R. A., 409

Automatic pipeting attachment for the Van Slyke manometric apparatus for CO_2 determination: Seligson, D. and Marino, J., 120

BACHRA, B. N., Complexometric titration of micro and ultramicro quantities of calcium in blood serum, urine and inorganic salt solutions, 107

BALIKOV, B. Assay of urinary peptides using a biuret reagent, 409

BAKER, H. Vitamin B-12 excretion as index of hepatic disorders: II. Correlation with liver-function tests, 27

BAKER, L., *see* KANABROCKI, E.

BARAK, A. J., *see* HUMOLLER, F. L.

BEACH, E. F., Enzymatic method for glucose determination in body fluids, 462

BEAUTYMAN, W., *see* CLIFFORD, T. C.

BELKO, J. S., *see* GIOVANNIELLO, T. J.

BERRY, J. E., *see* KANABROCKI, E.

Bilirubin, 211

Binding affinity of purified plasma proteins for phenethylbiguanide, an oral hypoglycemic compound: Shepherd, H. G. Jr., and McDonald, H. J., 496

Biological role of magnesium: Pleshchitser, A. Ia., 429

BISCHOFF, F., Spectroscopic data for steroids subjected to Zak color reaction, 300

Biuret reagent, 232

Buffer capacities of human blood and plasma: Ellison, G., Straumfjord, J. V., Jr., and Hummel, J. P., 452

BUSCH, R. D., *see* SILBER, R. H.

Calcium, serum, 200

Calcium, Ultramicro determination, 107

CANNAN, R. K., Proposal for a certified standard for use in hemoglobinometry: second and final report, 246

CARAWAY, W. T., Chlorine in distilled water as a source of laboratory error, 513

CASPE, S., Microbiologic determination of codehydrogenase in blood of patients with ulcerative lesions, 374

CASTELLO, R. A., *see* BALIKOV, B.

Catalase, 316

Ceruloplasmin, 519

Changes in the erythrocyte potassium in patients with cardiac failure treated with digitalis: Clifford, T. C., and Beautyman, W., 311

CHILCOTE, M. E., New micro method for the colorimetric determination of calcium in serum or urine, 200

Chloride, electrometric method, 159

Chlorine in distilled water as a source of laboratory error: Caraway, W. T., 513

Chronic alkalosis with damage to the central nervous system: Natelson, S., 32

CLIFFORD, T. C., Changes in the erythrocyte potassium in patients with cardiac Failure treated with digitalis, 311

Clinical Chemistry, (comments), O. H. Gaebler, 331

Codehydrogenase, serum, 374

Colorimetric method for the quantitative determination of plasma catalase activity: Dobkin, G. B. and Glantz, M. D., 316

Comments on the origins and development of clinical chemistry: Gaebler, O. H., 331

Comparative study of qualitative tests for ketones in urine and serum: Free, H. M., Smeby, R., Cook, H. and Free, A. H., 323
Complexometric titration of micro and ultramicro quantities of calcium in blood serum, urine and inorganic salt solutions: Bachra, B. N., Dauer, A., and Sobel, A. E., 107
Cook, M. H., *see* Free, H. M.
Copper serum, 43
Copper oxidase, 1, 519
Corticosterone, 278
Dauer, A. *see* Bachra, B. N.
Determination of hydroxyproline in liver: Fels, I. G., 62
Determination of isosmolar blood anticoagulant solutions by the freezingpoint method: Kaplan, H. M. and Stephens, E. F., 142
Determination of lipoproteins by paper electrophoresis: Moinat, P., Appel, W., and Tuller, F., 304
Determination of mercury in urine: Nobel, S. and Nobel, D., 150
Determination of plasma amine oxidase activity: Humoller, F. L., Majka, F. A., Barak, A. J., Stevens, J. D., and Holthaus, J. M., 1
Determination of serum lipoproteins by paper electrophoresis after preliminary staining with sudan black-B: Kanabrocki, E. L., Kaplan, E., Kinnory, D. S., Imperato, A. A., Berry, J. E., and Baker, L., 382
Determination of vitamin B_{12} with an *escherichia coli* mutant: Its advantage in clinical use: Aronovitch, J., and Grossowicz, N., 22
Dobkin, G. B., Colorimetric method for the quantitative determination of plasma catalase activity, 316
Electrometric method for the determination of chloride in serum and other biologic fluids: Seligson, D., McCormick, G. J. and Sleeman, K. 159
Electrophoresis, hemoglobin, 484
Lipoproteins, 304, 382
Proteins, 353
Starch-gel, 484
Electrophoretic migration pattern of serum glutamic oxalacetic transaminase: Shepherd, Jr. G., and McDonald, H. J., 13
Ellison, G., Buffer capacities of human blood and plasma, 452
Enzymatic method for glucose determination in body fluids: Beach, E. F., and Turner, J. J., 462
Evaluation of glucose determinations in untreated serum samples: Weissman, M. and Klein, B., 420
Extended use of the Kingsley biuret reagent: Kibrick, A. C., 232
Fels, I. G., Determination of hydroxyproline in liver, 62
Ferrohemoglobin solubility test: Its accuracy and precision together with values found in the presence of some abnormal hemoglobins: Goldberg, C. A. J., 146
Fibrinogen, 185
Fluorescent solutions, 286
Free, A. H., *see* Free, H. M.
Free, H. M., Comparative study of qualitative tests for ketones in urine and serum, 323

Contents

NO. 1, FEBRUARY

Determination of Plasma Amine Oxidase Activity
Fred L. Humoller, Frank A. Majka, Anthony J. Barak, J. D. Stevens, and J. M. Holthaus 1

Electrophoretic Migration Pattern of Serum Glutamic Oxalacetic Transaminase
Herndon G. Shepherd, Jr., and Hugh J. McDonald 13

Determination of Vitamin B_{12} With an Escherichia Coli Mutant: Its Advantage in Clinical Use
J. Aronovitch and Nathan Grossowicz 22

Vitamin B_{12} Excretion as Index of Hepatic Disorders: II. Correlation with Liver-function tests
Herman Baker, G. Brill, I. Pasher, and Harry Sobotka 27

Chronic Alkalosis with Damage to the Central Nervous System
Samuel Natelson 32

Serum Copper and Iron on a Single Sample
B. Zak and N. Ressler 43

Salting-Out of Serum Proteins after the Addition of Known Protein Fractions
E. Pagliardi, A. Vitelli, and G. Gaidano 49

Determination of Hydroxyproline in Liver
I. Gordon Fels 62

The Influence of Phenothiazine and Some of its Derivatives on the Determination of 5-Hydroxyindoleacetic Acid in Urine
George Ross, I. Bernard Weinstein, and Bernard Kabakow 66

The Clinical Chemist 77

Book Reviews 84

Abstracts 85

NO. 2, APRIL

The Microbiologic Assay of Vitamins in Clinical Chemistry: Donald D. Van Slyke Lecture, 1958
Harry Sobotka 93

The Complexometric Titration of Micro and Ultramicro Quantities of Calcium in Blood Serum, Urine, and Inorganic Salt Solutions
Bernard N. Bachra, Alan Dauer, and Albert E. Sobel 107

Automatic Pipeting Attachment for the Van Slyke Manometric Apparatus for CO_2 Determination
David Seligson and Jean Marino 120

Rapid System of Microchemical Analysis for the Clinical Laboratory
Abraham Saifer, Shirley Gerstenfeld, and Michael C. Zymaris 127

Determination of Isosmolar Blood Anticoagulant Solutions by the Freezing-Point Method
Harold M. Kaplan and Edward F. Stephens 142

The Ferrohemoglobin Solubility Test: Its Accuracy and Precision Together with Values Found in the Presence of Some Abnormal Hemoglobins
C. A. J. Goldberg 146

Determination of Mercury in Urine
Sidney Nobel and Deana Nobel 150

Electrometric Method for the Determination of Chloride in Serum and Other Biologic Fluids
David Seligson, Gerald J. McCormick, and Kenneth Sleeman 159

A Simple Viewer for Prothrombin Determination and Other Coagulation Tests
Thomas J. Giovanniello and John S. Belko 170

The Clinical Chemist 174

Abstracts 180

NO. 3, JUNE

Turbidimetric Analysis of Fibrinogen and Gamma Globulin with Ammonium Sulfate by Different Photometric Technics
Nancy S. Rafferty, Arthur G. Tyrol, Jr., and I. A. Parfentjev 185

Study of Dialyzed Reconstituted Dried Serum as a Clinical Chemistry Standard
Bernard Klein and Milton Weissman 194

A New Micro Method for the Colorimetric Determination of Calcium in Serum or Urine
Max E. Chilcote and Richard D. Wasson 200

111
13

Spectrophotometric Measurement of Bilirubin Concentrations in the Serum of the Newborn by the Use of a Microcapillary Method
David White, George Abu Haidar, and John G. Reinhold 211
A Simple Determination of Blood Alcohol for the Clinical Laboratory *Alan Mather* 223
Extended Use of the Kingsley Biuret Agent *Andre C. Kibrick* 232
The Determination of Volatile Phenols in Urine *S. L. Tompsett* 237
A Method for the Determination of Urinary Meprobamate
Elliott S. Harris and Jerry J. Reik 241
Proposal for a Certified Standard for Use in Hemoglobinometry: Second and Final Report *E. Keith Cannan* 246
Book Reviews 252
Abstracts 253
The Clinical Chemist 255
Pre-Registration Form for Tenth Anniversary Meeting 260

NO. 4, AUGUST

Urinary Calculi: I. A Simple Semiquantitative Method of Analysis
Henry O. Nicholas 261
Urinary Calculi: II. Classification of Calculi Found in the Southeast Texas Area
Henry O. Nicholas and H. F. Leifeste 267
Residual Serum Thrombin Activity *Murray Weiner* 271
Practical Procedure for Estimate of Corticosterone or Hydrocortisone
Robert H. Silber, Robert D. Busch, and Raymond Oslapas 278
Adaptation of the Beckman Model B Spectrophotometer to the Measurement of Dilute Fluorescent Solutions
Louis P. Joly, George Sobolewski, and Guy Nadeau 286
Serum Iron Determinations: Corrections for the Bathophenanthroline and Dipyridine Procedures *Harold L. Rosenthal, Mari Lou Pfluke, and Lois Jud* 290
Rapid Test for Detection of Certain Iodine-Containing Contaminants in Serum
Alfred Grossmann and Grace F. Grossmann 296
Spectroscopic Data for Steroids Subjected to Zak Color Reaction
Fritz Bischoff and John G. Turner, Jr. 300
Determination of Lipoproteins by Paper Electrophoresis
Pierre Moinat, Walter Appel, and Elizabeth F. Tuller 304
Changes in the Erythrocyte Potassium in Patients with Cardiac Failure Treated with Digitalis *Thomas C. Clifford and William Beautyman* 311
Colorimetric Method for the Quantitative Determination of Plasma Catalase Activity
Gerald B. Dobkin and Morton D. Glantz 316
A Comparative Study of Qualitative Tests for Ketones in Urine and Serum
Helen M. Free, Robert R. Smeby, Marion H. Cook, and Alfred H. Free 323
Comments on the Origins and Development of Clinical Chemistry *Oliver H. Gaebler* 331
The Clinical Chemist 339
Book Reviews 346
Abstracts 348

NO. 5, OCTOBER

Studies in Dysproteinemia: I. Clinical Significance of Some Abnormal Aspects of the Electrophoretic Pattern *Joseph Sternberg* 353
Microbiologic Determination of Codehydrogenase in Blood of Patients with Ulcerative Lesions *Saul Caspe and Daniel D. Pitcoff* 374
The Stability of Lactic Dehydrogenase in Serum
J. A. Lazaroni, E. C. Maier, and L. R. Gorzyca 379
Determination of Serum Lipoproteins by Paper Electrophoresis after Preliminary Staining with Sudan Black-B *Eugene L. Kanabrocki, Ervin Kaplan, David S. Kinnory, Alfred A. Imperato, John E. Berry, and Lyle A. Baker* 382

Sources of Variation in a Standardized and a Semi-micro Procedure for the Spectrophotometric Assay of Serum Glutamic-Oxalacetic Transaminase Concentration
A. J. Schneider and Myron J. Willis 392
The Assay of Urinary Peptides Using a Biuret Reagent
Bernard Balikov, Eloy R. Lozano, and Robert A. Castello 409
Evaluation of Glucose Determinations in Untreated Serum Samples
Milton Weissman and Bernard Klein 420
The Clinical Chemist 423
Book Reviews 426
Abstracts 427

NO. 6, DECEMBER

Biological Role of Magnesium (Biologicheskaia Rol' Magniia)
A. Ia. Pleshchitser (Gor'kii) 429
Buffer Capacities of Human Blood and Plasma
George Ellison, Jon V. Straumfjord, Jr., and J. P. Hummel 452
An Enzymatic Method for Glucose Determination in Body Fluids
Eliot F. Beach and James J. Turner 462
An Improved Periodic Acid Fuchsin Sulfite Staining Method for Evaluation of Glycoproteins *Warren F. McGuckin and Bernard F. McKenzie* 476
A New Method for Starch Gel Electrophoresis of Human Hemoglobins, with Special Reference to the Determination of Hemoglobin A_2 *C. A. J. Goldberg* 484
Binding Affinity of Purified Plasma Proteins for Phenethylbiguanide, an Oral Hypoglycemic Compound *Herndon G. Shepherd, Jr., and Hugh J. McDonald* 496
Improvement in PBI Method *Hubert W. Marlow* 510
Chlorine in Distilled Water as a Source of Laboratory Error *Wendell T. Caraway* 513
A Rapid Colorimetric Method for the Quantitative Determination of Copper Oxidase Activity (Ceruloplasmin) *O. Boyd Houchin* 519
The Clinical Chemist 524
Abstracts 538
Book Review 565
Letters to the Editor 566
Index 569
